

# JANUARY 2017 - OPTICAL SYSTEMS MADE BY VOSSLOH-SCHWABE

It takes the right kind of know-how to produce precise products of the highest quality.

The VS suite of lighting optics is not only subject to ongoing expansion, but also covers all applications thanks to a variety of radiation angles – symmetrical, asymmetrical and batwing. A diffuse model guarantees minimal colour distortion, while a further translucent optic that prevents multiple shadowing is perfect for manual workplaces.

#### LED LINE SMD KIT IP54

Based on a standard 3R module, our IP54 kit comes with a specially sealed optic that fully satisfies the more stringent requirements commonly found in industry, warehouse and logistics applications, amongst others.

Technical Data Sheet

# LED LINE SMD KIT 3R

Complementing the optics, we also provide matching LED Line SMD modules with a superior light quality up to 183 lm/W. Moreover, thanks to a new clip attachment, these optics are easy and quick to attach without needing screws. The clips are in the same colour as the optic and keep it securely attached to the luminaire even in the event of vibrations.
