## VS A2 BALLASTS READY FOR STAGE 3 OF EU 245/2009

No need to worry about the upcoming change to EU 245/2009, which is effective from 13 April 2017.

It will still be legal to use A2-class magnetic ballasts even after 13 April 2017. As of this date, the third stage of EU 245/2009 will come into effect for all member states of the European Union irrespective of whether electronic or magnetic control gear technology is involved. Outside the EU, products of all energy classes can continue to be used in unchanged form.

### Global market leader with decades of experience in electromagnetic technology

Vossloh-Schwabe is set to remain a reliable producer of and partner for magnetic control gear. We already began to provide magnetic devices that satisfy class A2 of the standard when the first stage became effective. Please refer to the overviews below for details.

The overviews also contain details of which ballasts can be adapted to satisfy the requirements of class A2 on request.

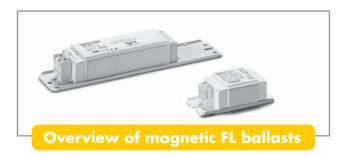

Your continued supply of suitable magnetic devices made by Vossloh-Schwabe is hence guaranteed – providing you peace of mind and a reliable support from Vossloh-Schwabe.

Please do get in touch with us today for any of your magnetic needs.

Overview of magnetic HID ballasts

#### Information on the EU standard

For non-EU states Vossloh-Schwabe will continue to produce magnetic control gear of classes B1, B2, C and D.
