

WE KNOW WE'RE DYNAMIC. BUT ARE YOU?

Dynamic lighting with flexible light distribution

Ensuring the right light at the workplace is key to any working day, be it in a factory, laboratory or an office setting. Optimum lighting enhances the wellbeing of employees and facilitates error-free performance. Our new **LED Line CSP Tuneable** modules come with dynamic light temperatures and are ideal for creating optimum lighting conditions.

Advantages of LED Line CSP Tuneable modules

- CSP (chip-scale packages) technology: smaller chip design, larger angle of radiation, homogeneous light distribution
- Available in two SMD versions: W2 and W4
- Dual-channel control: seamlessly dynamic light from 2,700 K to 6,000 K
- Unbeatable service life: L90/B10 at > 60,000 hours at 75 °C
- Desired lighting effect thanks to broad range of VS optics

Choose Tuneable White modules made by Vossloh-Schwabe – and make your light dynamic!

Yours,
The VS Sales Team

CSP-W2

CSP-W4

If you are already using our W2 and W4 LED modules, you can easily convert it to Tuneable White modules as the PCB dimensions are identical and existing optics fit perfectly.
