

LUGA COB MODULE - WE MAKE THE DIFFERENCE WHEN IT COMES TO SERVICE LIFE AND DEGRADATION!

Who'd want to buy a car that develops engine trouble after 30,000 kilometres or begins to guzzle fuel?

The same thing applies with regard to COB modules. Who'd want first outages to appear after 20,000 hours or find light output drops to only 50% (L70/B50) after 30,000 hours?

We have had our LUGA COB modules subjected to a new long-term test by an independent institute – both as individual components and professionally installed in luminaires taken from an existing project. The results were impressive and competing products literally pale in comparison.

Test report

And who'd want to pale in comparison?

LUGA COB modules deliver on a promise made by us. But don't just take our word for it - check them out for yourself.
