Linear LED NFC Drivers

- Contactless programming via NFC (Near Field Communication)
 - Selectable output current
 - Programmable CLO function
 - Adjustable DC level
- Suitable for central battery-powered emergency lighting systems in acc. with EN 50172
- Flexible handling thanks to a wireless programming unit

LEDLine Flex SMD – IP67

- Flexible 24 V SMD line module (SELV)
- Degree of protection: IP67 (protected against moisture and dust)
- 1000 lm/m
- Dimmable
