THE EASY WAY TO GET MORE OUT OF YOUR LIGHTING – LED OPTICS MADE BY VOSSLOH-SCHWABE

Vossloh-Schwabe is your first point of contact when it comes to the development and production of high-quality optics for lighting.

In addition to presenting other interesting information, our new brochure presents all available optics types.

Whether you need optics

- for shop, office, factory settings or street lighting,
- in circular, square or linear form (up to 2 m in length in one piece),
- made of high-quality PMMA, PC or silicone,
- with narrow, wide, asymmetrical or combined angles of radiation,

Our customised optics design service can deliver exactly what you need.

Work with us to create light characteristics that suit your individual needs.

Yours,

The VS Sales Team

More Information

You need a turnkey LED solution?

No problem. VS can provide you with all you need from a single source: LED modules, drivers, heat sinks and optics. Best of all, these perfectly matched systems also guarantee the greatest possible efficiency.
