

# **Panasonic Lighting Europe**

## **Environmental and Energy Policy**

### **MISSION**

In accordance with Panasonic corporate policies, we at Panasonic Eco Solutions Lighting Europe company (PESLEU) aim at providing comfortable residential and non-residential space for the people to live around the world, while reducing environmental impact.

### **POLICIES**

In view of this mission, we promote environmental and energy efficiency activities to reduce CO<sub>2</sub> emissions, advance recycling of resources, enforce chemical substances management, control efficient use of energy, and strive to continuously improve our environmental and energy management systems.

- We set objectives and targets for environmental and energy efficiency aspects, implement them, and review them periodically.
- We pay observance to relevant laws and ordinances and to relevant practices agreed upon with our partner organizations.
- We engage in education and awareness activities related to environmental and energy efficiency aspects.

As a member of the Panasonic group, we also have to follow applicable corporate guidelines on environmental and energy efficiency aspects.
