

## NEXT 111 R

FOR DIRECT CONNECTION  
TO MAINS VOLTAGE

## CONVENIENT LED TECHNOLOGY

As a perfect replacement for Halogen and HID lamps, these light engines are the perfect replacement for AR111 lamps. The direct connection to mains voltage (220–240 V) offers a cost effective solution. They are ideal for applications like retail, halls and public buildings.

The profiled reflector with the same design of AR111 lamps is ideal to replace Halogen/HID with LED technology and keep existing luminaire's design.

The aluminium reflectors offer an homogeneous light distribution spot. Next 111 R offers the possibility to replace the reflector easily.

### **NEXT 111 R series**

- Replacement for HID lamps and halogen lamps up to 150 W
- Interchangeable aluminium reflector for homogeneous light distribution

### **Typical applications**

- Replacement of AR111 lamps
- Integration in luminaires
- Retail lighting
- Downlights
- Light advertising
- Entertainment

## NEXT 111 R

**Built-in LEDSpot equipped with an interchangeable aluminium reflector, heat sink and leads – Replacement for AR111**

### Technical notes

For direct connection to mains voltage

Mains voltage: 220–240 V, 50/60 Hz

Power factor: > 0.95

Reflector: Ø 111 mm (with flange), aluminium, bayonet fixing

Heat sink material: aluminium

Max operating temperature at  $t_p$  point: 85 °C

Lumen maintenance:

L70/B50; 50,000 hrs. at 70 °C

Temperature depends on installation situation and has to be checked by the luminaire manufacturer.

Colour accuracy initially: 3 SDCM

Plastic clear cover to protect reflector (opaque cover on request)

Fixation

reflector: front rim

heat sink: lateral fixation with M5 screws and nuts or rear side fixation with self-tapping screws ST2.9

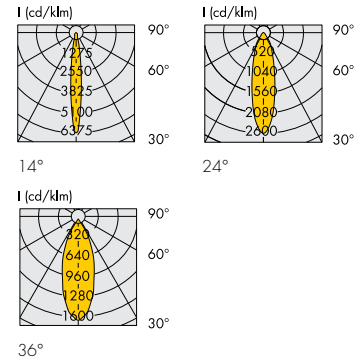

Leads: Cu tinned, stranded conductors 0.5 mm<sup>2</sup>,

FEP/FEP-insulation, length: 300 mm

With integrated cord grip

Weight: 430 g

Packaging unit: 6 pcs.

## Reflectors and Holder for NEXT 111 R

Exchangeable aluminum reflectors and holder for the NEXT series

### Technical notes

Reflectors made of aluminium with bayonet fixation

Surface: anodised

Weight: 27 g

Packaging unit: 18 pcs.

### Usage and maintenance

If necessary clean reflectors with mild soap, water and soft cloth.

Never use any commercial cleaning solvents on reflectors, like alcohol.

Please handle or install reflectors with wearing gloves, skin oils may damage reflector or its optical characteristic.

Ref. No.	Beam characteristic	Beam angle (°) NEXT 111 R 20
----------	---------------------	------------------------------------

#### Reflector D90 – H = 50

<b>557359</b>	narrow	14
<b>557360</b>	medium	24
<b>557361</b>	wide	36
<b>563446</b>	extra wide	48

It's possible to use all the reflectors on the same holder.

### Holder for EVO reflectors

For COB Type EDC57C

Cover for LES: PC, transparent

Dimensions (ØxH): 60 x14.65 mm

Packaging unit: 72 pcs

Material: PC, black, inner ring: metallized

**Ref. No.: 561847**

Material: PC, white

**Ref. No.: 563095**

## NEXT 111 R Installation Instruction

### General Safety Information

- Built-in LED Spot for direct connection to mains voltage
- VS product may only be installed and commissioned by authorised and fully qualified staff.
- These instructions must be carefully read before installing and commissioning the system, as this is the only way to ensure safe and correct handling.
- Before any work is carried out on the equipment, it must be disconnected from the mains.
- All valid safety and accident-prevention regulations must be observed.
- The products should never be inexpertly opened as this poses lethal danger due to electrical shock. Repairs may only be undertaken by the manufacturer.
- NEXT 111 R is dimmable with common phase-cut dimmers; minimum dimmer load has to be respected.
- The compatibility of the spots with the dimmer has to be confirmed prior to installation
- If module is used in rooms with fast moving parts as the light modulation might cause stroboscopic effects.
- This LED module might interfere with displays and cameras due to modulation.
- The photo biological safety of the LED modules is classified into risk groups in accordance with EN 62471: 2008 and IEC TR 62778: risk group 1.

## NEXT 111 R Tested Dimmers

NEXT 111 R is dimmable with common phase-cut dimmers; minimum dimming load has to be respected. The compatibility of the spots with the dimmer has to be confirmed prior to installation.
