Globus Gourmet is a deli shop that offers a wide range of delicacies from the list of the best deli shops in the world. The range of delicacies has more than 10,000 item names, including a significant proportion of foodstuffs presented in showcases. These are meat, fish, baked goods, handmade chocolates, cakes, culinary products. Proper lighting is required for the sale of this product range.

Vossloh-Schwabe produces LED modules intended to illuminate foodstuffs. For each product group we developed special LEDs with a certain colour temperature and spectrum. All showcases of the delicacies had fluorescent lamps replaced by LED lighting fixtures. The project used LED Line AluFix LUGA FOOD LED modules with special optics and aluminium contoured base for easy installation into ready-made showcases. These linear modules have been manufactured by using COB technology that allows to get a uniform illumination, rather than a point one.

- LED Line AluFix LUGA FOOD warm white for bread, fruits, vegetables, cheese
- LED Line AluFix LUGA FOOD neutral white for fish
- LED Line AluFix LUGA FOOD "pink effect" for red meat
- LED Line AluFix LUGA FOOD "white effect" for poultry
- LED Line AluFix LUGA FOOD pearl white for chocolate

Each 1.15m long module has a capacity of 46W.
