

ORCHID COUNTRY CLUB SINGAPORE

The Orchid Country Club

An impressive 200 pieces of AluLED (3000 K) modules in varying profile lengths of 320 mm and 1,220 mm paired and controlled with 40 pieces of EDXe1130/24.014 were used in cove lighting application within the lobby façade illuminating intricate features in the lobby ceiling as decorative features.

AluLED IP64, suitable for outdoor protected applications under humid conditions (excluding direct UV and water exposure) and the slim & flat design is extremely flexible for low profile lighting design mounting. Available in different CCTs and RGB to suit different application needs. The RGB system is based on the "common anode" principle. The DigiLED CA series permits the operation of high-power RGB modules and low-power modules of "common anode" design.

The Singapore Orchid Club is a prestigious club and leader in golf and hospitality sector in Singapore. Delighting guests in a unique experience and quality lifestyle, offering fantastic retail opportunities to those wanting maximum exposure for a nominal investment.
