arclite® light solutions

■ FASHION FOR THE FAMILY

Represented on the market for more than 30 years and with currently around 1,800 retail outlets, TAKKO Fashion has grown into one of the most successful fashion chains in Germany and in the heart of Europe.

For large retail chains such as TAKKO, monthly energy consumption adds up to a considerable cost factor, of which lighting makes up the largest share with around 50% to 60%.

In seeking to lower energy costs, TAKKO has also opted for LED lighting technology. In conjunction with the independent photometric laboratory of Dr.-Ing. Uwe Slabke, Bensheim, TAKKO issued a Europe-wide invitation to tender.

The winning bid came from the company Arclite Lichtvertrieb GmbH, Bargteheide, near Hamburg, with luminaires featuring LED modules made by Vossloh-Schwabe. Thanks to their outstanding performance data with regard to light output and energy efficiency, plus a 5-year warranty, Vossloh-Schwabe's LED modules helped to win the day. The fashion retail chain TAKKO brings dreams of well-fitting, trendy fashions made of high-quality fabrics to life. With the help of perfectly staged light scenes, VS helps to create moments that add further value to fashions.

VS LED products come with an impressive array of features:

- LUGA Shop COB Module WU-M-462
 - Long service life: 50,000 h
 - Minimal decrease in luminous flux: L90/F10
 - Colour temperature: 3500 K
 - Colour rendering index CRI: Ra > 80 and > 90
- 5-year warranty
